Smart Lockers

The intelligent Smart Locker System features a state-of-the-art system of modular lockers, locking devices and system software to offer customers secure, efficient and convenient drop-off and pick-up of packaged assets with 24/7 access and complete tracking accountability.

Make every delivery more accountable.

Our Smart Locker consultants will carefully analyze your existing environment, future objectives and will develop a detailed delivery system that fully meets your needs.

Smart Locker System Benefits:

- 24/7 convenience access for parcel pick-up
- Email/Txt notification for pick-up
- Total Security of packages and risk reduction of lost packages
- Complete Tracking/Accountability - log kept of every package drop-off and pick-up - 100% chain-of-custody
- Reduction of labor and time - fewer resources required to deliver packages
- No signature required - electric log alleviates this need
- Higher customer satisfaction - recipients will know when a parcel has arrived and is available for pick-up
- Specialty lockers

“Because we aren’t pushing mail carts around, the rate of package distribution efficiency has almost doubled!”
